

### Full Automatic System (Automatic Tablet Dispensing & Packaging System - ATDPS)

A machine that is supported by Automatic Tablet system has functions as automatic medicine packaging for one-time consumption, both for unit dose and multi-dose. Beside those machines have function as medicine storage and medicine database system.

The machine is able to store many items of medicine in good condition for long period. Those machines are supported by automatic printing devices, which is operated by internal computer so that the pharmacy can attach medication e-ticket on the medicine packaging. It is also easy to operate, so it can support and fasten the pharmacist work. The machine also has database system that can connect to information system of hospital or pharmacy who are using it.

Full automatic machine (Automatic Tablet Dispensing & Packaging System - ATDPS) series are :
